

# Exercises Set 2

Paul Dubois

September 14, 2023

## Abstract

Only the questions with a \* are compulsory (but do all of them!).

## 1 Systems of Linear Equations

Find the Reduced Row Echelon Form of the following matrix:

$$\begin{pmatrix} 1 & 2 & 3 & 4 \\ 0 & 6 & 2 & 3 \\ 0 & 0 & 0 & 10 \end{pmatrix}$$

(\*) Solve the following linear system using Gaussian Elimination:

$$2x + y - z = 4$$

$$3x + 2y + z = 5$$

$$x - y + 3z = 7$$

Start by writing the augmented matrix for the system and perform the necessary row operations to find the solution.
